## DETAILED ACTION

### CLAIMS PRESENTED

Claims 1-2 are presented.

### CLAIM REJECTIONS

#### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph -- as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

What is the subject matter which the applicant regards as his invention?

This subject matter is not described with particularity. Furthermore, the claim(s) are narrative in form and replete with indefinite and functional or operational language.

The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only.

Applicant is advised to look at claims of US patents. The website of USPTO provides US patents.

#### *Claim Rejections - 35 USC § 112*

Art Unit: 2134

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter (such as the computer software architecture) which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. For example, a code or pseudo-code or at least a flow chart would be necessary to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-2 are rejected under 35 U.S.C. 102(a) as being anticipated by Krapf

(<http://www.bcr.com/bcrmag/1999/07/p36.php> ).

Art Unit: 2134

Regarding claim 1-2 Krapf teaches to the extent that is understandable to the Patent Office. See particularly, the second and the fourth paragraph of Krapf.

***Conclusion***

The art made of record and not relied upon is considered pertinent to applicant's disclosure. The art disclosed general background.
